

In-band competitor prices and recommended Verodus card

Street fees only for plans with $|D - D_{\text{Verodus}}| \leq 6$ (same family). Recommended sale factors difficulty: harder in-band plans can charge more; easier holes are ignored. 16 August 2026.

D = 0.55 × rules + 0.45 × book. Band ±6 is about one daily-DD step. Instant \$25k+ must print (20% column). 1-Step / Lite / Pro already print at live VERO35; those raises take unused power so we stop selling a same-D product cheaper than Hola / Ment / Goat. List = sale ÷ 0.65. Instant \$200k pulled.

1. Recommended Verodus sale (VERO35)

Plan	D	\$5k	\$10k	\$25k	\$50k	\$100k	\$200k	Live \$100k	Rec m \$100k	Anchor

Green = recommended sale. Instant \$5k / \$10k stay at live (already above the print floor). Every other Instant size moves up. Eval raises are optional power — live still prints if you hold today’s card.

2. Instant — in-band street (D 89.2)

D 89.2 — hardest Verodus line. Same 22% P(pay) as Blue Guardian, but five points harder (peak daily, trail never locks). \$5k / \$10k already print and sit between Goat and Hola. From \$25k, live is +10% / −13% / −29%. The 20% floor lands on Hola at \$25k–\$50k. At \$100k, Hola \$839 and Instant Funding \$639 lose money; matching BG \$467 is a −95% product. Charge like Hola, not like BG. No \$200k Instant.

In band: Instant Funding, Hola Direct, Goat, FP Zero, FXIFY Lite, Alpha Instant, Blue Guardian. Out: FN Instant, FXIFY Standard (no daily).

3. 1-Step — in-band street (D 81.5)

D 81.5 — same as FundedNext 1-Step (81.9), slightly harder than FTMO (78.9), slightly easier than Hola (85.9). Live already prints +58–76% and is the cheapest in the band. We are not an easier product than FTMO, so \$335 vs \$579 is a gift. Price to Hola; stay well under FN / FTMO.

In band: Hola 1-Step, FundedNext 1-Step, FTMO 1-Step, 5ers Hyper Growth. Out: FP Flex, Alpha One, E8.

4. 2-Step Lite — in-band street (D 77.7)

D 77.7 — same as FundedNext Lite (77.1), Ment (77.3), For Traders (77.4). Live is the cheapest in the band by a wide gap. \$241 vs Ment \$343 / FN \$449 underprices the same product. Match Ment (cheap same-D peer); stay under FN Lite.

In band: FundedNext Lite, Ment, For Traders, FXIFY 2-Step. Out: FTMO-class / Pro (D ~63).

5. 2-Step Pro — in-band street (D 64.0)

D 64.0 — same as FTMO 2-Step (63.2) and FN 2-Step (63.2). Live is #2 cheapest after Maven. We do not have FTMO’s brand, so do not go to \$626. Price like Goat / Funding Traders (D 62.7–62.8): mid-cheap in the FTMO class, still \$227 under FTMO at \$100k. Skip Maven’s race to the bottom.

In band: FTMO, FN, Maven, FP Standard/Flex, Alpha Pro 10%, Goat, Hola, TFT, BrightFunded, CTI, Fintokei, Funding Traders, 5ers High Stakes. Out: Lite-class, Alpha Pro 6%.

6. List (VERO35) and live vs recommended

Shopper pays sale. List = sale ÷ 0.65 so VERO35 still lands on the card. Margin uses this book’s E[cost] (payout + expected refund).

Blue = live already equals rec. Green = raise. Instant \$25k / \$50k / \$100k are the only must-moves. Out of band and ignored: FundedNext Instant, FXIFY Instant Standard, FP 1-Step Flex, Alpha One, E8, Lite vs FTMO/Pro, Alpha Pro 6%. Same book 7/22/26/28/17.
Formula: sim/difficulty.py.

7. Will it sell? Rec vs in-band low / median / average / high

% is (rec – stat) / stat. Negative = cheaper than that peer mark, so easier to sell. 1-Step \$5k / \$10k average is pulled up by 5ers Hyper Growth (\$260 / \$450) — a 50% split live-from-day-1 product; the real twin there is Hola.
Instant lows are unprofitable Alpha / FP / BG holes — being above them is required to print.

Blue = at or under the in-band median (should sell). Green highlight on Instant \$100k = above every in-band peer — that size sells only to shoppers who want the never-lock card, not the price shopper. \$25k / \$50k Instant sit just under Hola (the same-D high) and will sell as a premium Instant, not as the cheap Instant.
