

Break-even and rank at 40% / 60% pricing

Every Verodus plan and every competitor plan in the 20-firm book. Same family, same size. Rank 1 = cheapest street price. 16 August 2026.

Break-even (BE) is the fee that sets expected contribution to zero after payouts and refunds on this book. **40%** and **60%** are the fees that deliver those contribution margins: $\text{fee} = \text{BE} / (1 - m)$. Street is what the shopper pays today (VERO35, BG25, HELLO, MATCH20, FUNDED40, or the typical ~20% promo). Rank in parentheses is among all products in that **family + size** (Instant vs Instant \$100k, not Instant vs a 2-step). For Verodus @40% and @60%, the rank is where that fee would sit against everyone else’s **current street sale** plus that fee. Instant \$200k is not offered.

1. Verodus — if we price at 40% and at 60%

This is the decision table. Street (rk) is today’s VERO35 rank. @40% (rk) and @60% (rk) are the hypothetical ranks if we moved to those fees and every peer kept today’s sale.

Read the parenthesis as “cheapest-to-dearest place in this family and size.” Instant @40% is mid-to-dear because a solvent Instant fee sits above the loss-leading street (BG \$54/\$467, FP Zero \$48/\$444, Alpha \$40/\$274). 1-Step and both 2-steps @40% stay near the cheap end — unused pricing power. @60% on Instant is the top of the field at \$25k+; @60% on 1-Step / Lite / Pro is still inside the pack.

5. Three-step — every plan

Every SKU in this family. BE is that product’s own break-even. Street (rk) is today’s shopper price and its rank in this size. @40% (rk) and @60% (rk) on a Verodus row are our hypothetical fees. On a peer row those two columns are that peer’s own 40% / 60% fees from the same book (no rank — the rank question is ours).

6. How to use the ranks

A cheap rank at @40% (1-Step, Lite, Pro) means we can raise toward 40% and still look inexpensive next to FTMO / FundedNext / Hola. A dear rank at @40% on Instant means a solvent Instant fee will not win a price war — and should not try. Peers whose street is far below their own BE (red Instant \$25k–\$100k at BG, FundingPips Zero, Alpha) are not a rank to chase. Same book for every row: 7% Pro / 22% Semi-skilled / 26% Average / 28% Aggressive / 17% Lottery. Sources and rule cards live in the industry Monte Carlo notes; this report is only BE, street, and rank.

Book: results/industry_skus.csv · Engine: sim/industry_book.py · Catalog: sim/catalog.py · Instant \$200k removed · Lite funded DD 8% · Blue Guardian Instant = live BG25.
