

Verodus checkout add-ons: competitor analysis

19-peer CFD street, August 2026. Challenge fees stay locked. This card answers whether the add-on menu should change to stay attractive, and why each Verodus line is priced as it is.

1. Verdict — change two lines, keep the rest

Yes. Two product changes make the menu look like the street without reopening Instant 90%+anytime (the year-1 floor) or copying loss-leaders.

1. Weekly Rewards: 70% split at 6% of list → 80% split at 8% of list. Default is already 80% biweekly. A 70% weekly SKU reads as a FundingPips / Hola trap (faster cycle, worse split). Shoppers who want weekly cash flow should keep the same 80%. 8% of list undercuts Blue Guardian’s 7-day +15% and BrightFunded weekly +25%. Instant \$100k leftover after ads is about **+\$5**; Pro \$100k about **+\$11**.

2. Instant 90% solo: 20% → 15% of list. Blue Guardian Instant 90% is +15%. Alpha is ~10%; FXIFY / BrightFunded are 20%. Matching BG on the solo 90% line is the shopper comparison. Extra E[X] on Instant 90% *alone* is the split (~12.5% of year-1 BE, ~\$35), not the 41% anytime stack. 15% of \$675 stickers \$101; after VERO35 and 20% ads leftover is about **+\$17**. Do **not** drop the 90% + on-demand *bundle* below 32%.

Do not cheapen Swing 20%, eval 90% On Demand 20%, Instant 90% On Demand 32%, or add Blue Guardian’s 30/35/40 copy ladder. Do not match FundedNext on-demand +5% with 95%. Challenge rec sales stay: Instant \$49/\$69/\$139/\$239/\$439; 1-Step \$36/\$60/\$120/\$193/\$335/\$654; Lite \$42/\$55/\$94/\$149/\$269/\$499; Pro \$45/\$59/\$95/\$159/\$289/\$577. Coupon VERO35 = 35% off list + stickers.

2. Locked Verodus menu after the attractiveness pass

Add-on	Evals	Instant	What it does	Why this %
News trading	12%	12%	Turns the funded high-impact news window off.	Live is 15%. Street often includes eval news or buries it in Swing. 12% is below live and still insurance.
Weekend holding	12%	12%	Turns Friday 22:00 UTC flatten off.	Live is 18%. The5ers / FXIFY evals / Goat CFD include it. 12% is the paid SKU, not a 18% premium.
Swing (both)	20%	20%	News + weekend as one add-on. Second row shows Incl.	FTMO Swing is a SKU (~10–15% + 1:30 lev). Instant Funding is one toggle. 20% saves 4pp vs 12+12.
Weekly Rewards	8%	8%	Every 7 days at the default 80% split. XOR with on-demand and 90%.	Was 70% @ 6% (gotcha). 8% still prints. BG 7-day is 15%; BrightFunded weekly is 25%.
On Demand 80%	12%	15%	Anytime withdrawal, keep 80%. XOR with weekly.	BG Instant includes this (their default is on-demand). Verodus default is biweekly, so speed is paid. Instant 15% matches BG’s 7-day fee, not FN +5%.
90% Reward Split	12%	15%	Keep 90% on the default biweekly cycle. XOR with weekly.	Street 10–20%. Eval 12% undercuts BG 15%. Instant 15% matches BG Instant 90% solo. Alpha 10% is too thin on Instant leftover if bundled with speed.
90% On Demand	20%	32%	Both on-demand and 90% on. 90% row Incl. Not 12+12 / 15+15.	Only BG publishes a real bundle save (15+15→25%). Eval 20% undercuts that 25%. Instant 32% is year-1 extra E[X] (~\$116) after ads. BG Instant 15% for 90%+OD is –\$64 here.
Accounts 1–4	VERO35 each	VERO35 each	Same add-ons on every copy. No extra % off copies. No 5th free.	Only BG has a shopper 4-pack (25/30/35/40). Instant leftover ~\$13 cannot fund a visible extra cut. VERO35 already 35% vs BG 25% on copy 1.

Green = locked rec. Sticker = round(list × %). First-payout refund is the challenge fee only — add-ons stay.

3. What the 19-peer street is actually selling

Most firms do **not** have a five-toggle menu. Split and speed are often the product (FundingPips, Hola, E8, Fintokei). Holding is often free on evals (The5ers, For Traders, Goat CFD, FXIFY). The shops that look like Verodus — Blue Guardian, FundedNext, FXIFY, BrightFunded, Instant Funding — are the ones the % rec has to beat on a screenshot.

Firm	90% / higher	Faster payout	Weekly	Swing / hold
FTMO	—	—	—	12%
FundedNext	30%	5%	25%	—
The5ers	—	—	—	incl.
FundingPips	incl.	incl.	incl.	—
E8 Markets	—	—	—	—
Alpha Capital	10%	—	—	—
Goat Funded	20%	—	—	incl.

Firm	90% / higher	Faster payout	Weekly	Swing / hold
Maven	10%	—	—	—
Hola Prime	incl.	—	incl.	—
FXIFY	20%	—	5%	incl.
Instant Funding	10%	—	incl.	—
Fintokey	incl.	incl.	—	—
For Traders	—	—	—	incl.
The Funded Trader	—	—	—	—
City Traders Imperium	—	incl.	—	—
Funding Traders	—	—	—	—
Blue Guardian	15%	15%	15%	—
BrightFunded	20%	—	25%	incl.
Ment Funding	—	—	—	—

incl. = in the base product (0% extra). — = not sold as a percent of fee. Green = firms whose published +% set the screenshot comparison.

4. How each street cluster prices the same idea

90% / 95% / 100%. Published fees cluster 10–20% of the challenge: Alpha ~10%, Instant Funding ~10% for +10pp split, Blue Guardian 15%, FXIFY and BrightFunded 20%, Goat futures 90% 20% (CFD 100% unpublished). FundedNext Lifetime 95% is 25–30% — a different product. Verodus eval 12% sits under BG. Instant 90% solo at 15% sits on BG, under FXIFY.

Speed. Blue Guardian eval 7-day +15%. FXIFY biweekly +5% off a monthly default. BrightFunded weekly +25%. FundedNext biweekly +15–25%. FundingPips and Hola do not charge a fee: weekly is a worse split (60% / 65%). That is the model Verodus is leaving. BG Instant Standard includes on-demand at 80%; Verodus Instant does not, so on-demand 80% at 15% Instant is the paid equivalent of what BG gives away.

90% + speed as a bundle. Only Blue Guardian publishes a real save: 15+15 → 25%. FXIFY stacks 20+5 with no save. FundedNext +5% on-demand already includes 95% — that is a loss-leader (Instant \$100k leftover about –\$99 if copied). Verodus evals: 12+12 → 20% (save 4pp, cheaper than BG 25%). Instant: 15+15 would be 30% and still a hole; 32% is the floor that almost clears year-1 extra E[X] (–\$4).

Holding. The5ers, Fintokey, For Traders, Goat CFD, and FXIFY evals include weekend. FTMO, Alpha, Maven, and Instant Funding sell Swing as a SKU or one toggle. FTMO Swing is roughly a 10–15% SKU premium plus 1:30 leverage. Charging 12%+12% and bundling at 20% is in-family with Instant Funding’s news+weekend add-on. Blue Guardian does not sell this pair.

Quantity. Only Blue Guardian has a shopper-facing 4-pack ladder (site code 25%, then 30/35/40, 5th-free on some futures). FundedNext Double Up is +40% now for a second account after you pass. For Traders uses BOGO. Instant Funding uses points on the next order. VERO35 is already 35% off every copy — better than BG’s 25% on the first and about even with BG’s ~32.5% average on a 4-pack. Extra cuts on copies 2–4 do not print on Instant (~\$13 leftover) or Lite (~\$14). A 10% extra on Instant \$100k copy 2 is about –\$22 after ads.

5. Leftover check — why 32% Instant and why not 15%

After ads = sticker × 0.65 × 0.80 – extra E[X] = sticker × 0.52 – extra. Instant extra: weekly speed ~8% of year-1 BE \$284; 80% on-demand ~12%; 90% solo ~12.5%; 90%+anytime ~41% (~\$116). Eval extra is first-payout only (Pro BE \$151). Weekend gap tail is not in extra E[X] — keep Swing at 20%.

SKU	Sticker	Extra E[X]	After ads	Prints?
Instant weekly 80% @ 8%	\$54	\$23	\$5	yes
Instant 80% on-demand @ 15%	\$101	\$34	\$18	yes
Instant 90% solo @ 15% (new)	\$101	\$35	\$17	yes
Instant 90% solo @ 20% (old)	\$135	\$35	\$35	yes
Instant 90% On Demand @ 32%	\$216	\$116	\$–4	thin — keep
Instant 90%+anytime at BG 15%	\$101	\$116	\$–64	NO — hole
Instant 90%+anytime at FN 5%	\$34	\$116	\$–99	NO — hole
Pro weekly 80% @ 8%	\$36	\$8	\$11	yes
Pro 80% on-demand @ 12%	\$53	\$8	\$20	yes
Pro 90% @ 12%	\$53	\$19	\$9	yes
Pro 90% On Demand @ 20%	\$89	\$19	\$27	yes
Pro 90%+7-day at BG 25%	\$111	\$19	\$39	yes
Pro Swing @ 20%	\$89	\$9	\$37	yes
Instant Swing @ 20%	\$135	\$37	\$33	yes

Green = rec. Red = do not copy. Instant 90% On Demand at 32% is –\$4 — the floor, not a cut. BG Instant 15% and FN +5% for 90%+anytime are holes of –\$64 and –\$99 on Instant \$100k.

6. Why not match the cheapest published line

Alpha 10% 90%. Fine as a solo eval sticker. Instant \$100k at 10% stickers \$68; after ads ~\$35 versus 90% extra ~\$35 — breakeven solo, insolvent the moment the buyer also wants anytime. Verodus sells those as a bundle at 32%, not as 10%+15%.

FundedNext +5% on-demand with 95%. Screenshot-cheap. Extra E[X] on Instant is the 90%+anytime stack. 5% of \$675 is \$34; after ads \$18 versus \$116 cost. Ignore it. FN's 95% Lifetime add-on is 25–30% of fee — that is the real 95% price.

Blue Guardian Instant 15% for 90%. Their Instant Standard already includes on-demand at 80%. The 15% only buys the extra 10pp of split. Verodus Instant default is biweekly 80%, so the same 15% would buy 90% *and* anytime if copied as one SKU. That is a different product. Copy 15% for 90% *solo*. Keep 32% when anytime is on.

Weekly 70% at 6%. It printed, and it was the cheapest speed SKU on the street. It also taught shoppers that faster = worse split, which is FundingPips' trick. Default 80% weekly at 8% is the attractive read and still prints.

7. Firm-by-firm notes (why they do not set the rec)

Firm	Note
FTMO	No add-on menu. Swing is a product, not +% toggles.
FundedNext	On-demand +5% with 95% is a loss-leader. Do not match.
The5ers	Holding is free. Split is the product, not an add-on.
FundingPips	No % add-on menu. Shopper picks a cycle. Weekly is a worse split.
E8 Markets	Higher split raises the sticker; % not a separate line.
Alpha Capital	Cheapest published 90% (10%). Speed is a SKU, not 15%.
Goat Funded	Use +20% as the CFD 100% proxy (futures 90% is +20%). Holding free.
Maven	Cheap sticker, 80% default. Do not lead Verodus with 90%.
Hola Prime	Same idea as FundingPips. Faster cycle = worse split.
FXIFY	Evals: holding free, 90% is +20%. Instant 90% included.
Instant Funding	Swing is one toggle. 90% add-on named +10pp split; treat fee as ~10%.
Fintokey	90% and holding are the product. No checkout % menu.
For Traders	Holding free. Split is a config slider.
The Funded Trader	SKU mix, not a Verodus-style toggle menu.
City Traders Imperium	On-demand at 80% is the product.
Funding Traders	No public add-on menu in the 20-firm CFD set.
Blue Guardian	Template for Verodus evals. Instant 15% for 90%+OD is insolvent here.
BrightFunded	90% +20% matches FXIFY. Weekly is expensive vs Verodus 8%.
Ment Funding	90% exists; % not on the public CFD help we could pin.

8. Checkout logic that must ship with these prices

Sticker = round(list × %). VERO35 is 35% off (list + stickers), capped at 35%. Cart = (list + stickers – coupon) × quantity. Quantity 1–4; same add-ons on every copy. News + weekend = Swing at 20% (weekend row Incl.). On-demand + 90% = 90% On Demand at 20% eval / 32% Instant (90% row Incl.). Weekly XOR both payout upgrades. On-demand and 90% may both be on — that is the bundle, not a stack of 12+12 or 15+15. Tooltips are product/rules only — never “X% of list”. 80% / 90% in copy is the split, not the fee. First-payout refund is the challenge fee only. Complete HTML with this logic: landing/checkout.html. Drop-in for live checkout.css: landing/checkout-addons.html.

Challenge rec fees do not move. Add-on cash is extra AOV. Do not cut Instant \$439 / Pro \$289 / Lite \$269 / 1-Step \$335 because some buyers add Swing.
