Verdict. On the shopper door Verodus is cheaper on Instant and 1-Step; FundedHive Classic is cheaper than Verodus Pro and close to Lite. On operator leftover, FundedHive Classic \$100k keeps **\$173** vs Verodus Lite **\$145** / Pro **\$168**. FundedHive Instant \$10k @ \$299 keeps **\$261** on first payout (m +87%); Verodus Instant \$10k @ \$69 keeps **\$41** on the year-1 card (m +60%). PFP 2-Step access is a hole from \$100k until the 1–3% funded fee — Verodus has no PFP analog (fee is up front). Hive Coin is not cash (k = 0). Verodus evals refund the challenge fee on first reward (k = P(pay)). Instant is not refundable on either firm.

Read the Instant \$10k line: Verodus door \$69 vs FH \$299. Operator leftover \$41 vs \$261. Verodus first-payout E[X] \$82 is above the \$69 sale — the 3% daily and 20% Best Day cut P(pay) to 21% (FH 46%) but the first check is larger. Year-1 is the right Verodus Instant BE because Instant is funded on day 1.

How to read this

- **Side-by-side only these two firms.** Same industry book. Verodus prices are the locked VERO35 rec card. FundedHive Classic list is TheTrustedProp; Instant \$299 is on-chain Jun 2026.
- **Prints?** leftover $\geq -\$1$ after that firm's true cost. Verodus evals include the first-fee refund. Verodus Instant uses year-1 $E[X]$. FundedHive uses first-payout $E[X]$, $k = 0$.
- **BE = $E[X] / (1 - k)$.** Hive Coin is a coupon ($k = 0$). Verodus Instant $k = 0$. Verodus evals $k = P(\text{pay})$. 20/40/60 = BE / $(1 - m)$.
- **Instant Best Day** on Verodus is 20% of Positive Days' Profit at payout request. No min days. 1-Step Best Day stays 50% to pass and to get paid.
- **Instant \$10k @ \$299** (FH) is B-book L1, one cash-out, 6% static, no daily, 2% max/trade. Residual risk is the doubling tower. Verodus Instant residual is year-1 survival after the 3% daily / 6% trail / 20% Best Day.
- **A-book clawback** on FundedHive is not in $E[X]$. Leftover there is a floor. Verodus has no published A/B switch.
- **News is included** on every Verodus phase and funded account, and allowed on FundedHive. Weekend holding is a Verodus paid add-on; FH eval yes / funded no.

Verodus Instant/Lite/Pro print engine is the daily DD (3/4/5%). FundedHive print engine is the 3% (evals) / 2% (Instant) max-per-trade cap. That is why FH Lottery almost never pays and Classic leftover is fat at a cheaper door.

Caveats

- FundedHive Classic list is from TheTrustedProp, not a scraped checkout (Cloudflare blocked later live fetches). Re-check stickers on fundedhive.com before using leftover \$ as live P&L.
- Verodus numbers are the locked rec card + news-included aligned book. WorkerBee / QueenBee are not priced separately; NewBee 70% is the Classic default.
- PFP funded-fee mix uses this book's 7/22/26/28/17, not FundedHive's unpublished Low/Mod/Med/High mix. E[X] is first cash-out except the Verodus Instant year-1 column.
- \$100 minimum reward is assumed on both. Instant on FH may need the 6% scale target before a full withdrawal. Do not change performance-reward.html. 1-Step Best Day stays 50%. Instant Best Day stays 20% at payout request.
