

Alexander Vladimirovich

Co-Founder & Chief Operating Officer, Verodus

British Columbia, Canada · alexander@verodus.com · verodus.com

PROFILE

Finance professional and operator. BBA in Finance (Great Distinction), MBA in International Business, and CFA Program Level II. Five years as a trading professional at WWA Trading (Dubai forex day-trading education, liquidity and intraday execution) and a CIBC Wood Gundy internship. Now co-founder and COO of Verodus — operations, process design, and commercial execution, not software engineering.

PROFESSIONAL EXPERIENCE

Co-Founder & Chief Operating Officer February 2026 – Present

Verodus British Columbia, Canada

- Co-founded Verodus, a technology-enabled trader evaluation platform that assesses discipline, consistency, and risk control in simulated markets and pays performance rewards against published rules.
- As COO, own operations: evaluation process design, payout verification, trader support, and commercial priorities. Work with engineering on delivery — this seat is operations and commercial, not software development.
- Set the evaluation rulebook: challenge families, drawdown, best-day constraints, and payout policy.
- Lead partnership discussions on commercial structure and go-to-market; take material terms back to the other founders and investors before anything is agreed.

Trading Professional 2020 – 2025

WWA Trading Dubai — forex day-trading education

- WWA Trading is a Dubai e-learning firm (founded 2019–20) that teaches forex day trading: liquidity, why retail traders get induced, and execution in the London and New York sessions. Live pre-market analysis, bootcamps, 1:1 mentorship, and a member community aimed at prop-firm funding — not a broker, not a fund.
- Spent five years there as a trading professional: market analysis, execution discipline, and performance review, inside that liquidity-and-intraday framework.
- Applied a structured process — risk limits, liquidity awareness, setup criteria — and kept disciplined follow-through in fast-moving FX conditions.

Intern May 2021 – August 2021

CIBC Wood Gundy White Rock Branch, British Columbia

- Supported investment advisors with research, client-file preparation, and day-to-day branch operations in a regulated wealth-management environment.
- Assisted with market commentary, account documentation, and administrative tasks.
- Gained exposure to client-service standards, compliance, and product discussions. Summer internship concurrent with WWA Trading.

EDUCATION & CREDENTIALS

Master of Business Administration, International Business 2020 – 2024

Bachelor of Business Administration, Finance 2017 – 2020

Great Distinction · Dean’s Honour List · CFA Program, Level II (CFA Institute; not a charterholder)
