

Joe Wong — full briefing (meeting, email, Bookmap, terms)

Karma Lounge meeting · follow-up email · public record · 22 August 2026

For Alexander and Kim · Does not change website copy

Joe asked in the room for a cut of referred customers, for Verodus's evaluation engine, and for the trading data. The follow-up email asked for an unpaid official partner logo and still describes Verodus as Bookmap. Believe the meeting. Paper net evaluation-fee origination. Do not share data. Do not give him the engine as his product.

Three separate asks. Referral %: yes, unique code, 15–25% of net Instant / 1-Step / Lite fees, rules unchanged, 90 days. Engine / PropTrade: later, white-label, Verodus keeps the stack. Data: no under current Privacy. Mixing them into one yes trains TAMS and helps him clone PropTrade off your tape.

This file replaces the shorter 21–22 August notes as the single download. Inside: Kim's four lines; what Joe seeks vs what each side gets; who he is; the four brand names; the claim table; the Bookmap leftover and the 10FOUR analogue; Bookmap data collection; the generic HK-credibility memo; Verodus terms and kill line; the reply Alexander can send; walk-away.

1. What Joe is seeking, what he would get, what Verodus gets

	If Verodus agrees to the email as written	If Verodus agrees on Verodus terms
Joe gets	Free long-term logo; prize accounts; your name next to OHKF / SFC / Saudi; a live shop to point PropTrade at; the list stays his	A tracked referral cut; later a front-end brand on Verodus rails; no data; no exclusivity
Verodus gets	Almost nothing in checkout. Reputational liability. He can still launch PropTrade elsewhere and say you partnered	Tagged Asia challenge fees now; PropTrade GMV on your rails later if the pilot clears a floor
He asked in the room (Kim, 21 Aug 18:03)	Not in the email	% of directed customers; he has no competition engine; he wants the data
He asked on paper	Unpaid official long-term partner of a 2026/27 HK-final competition via World Traders Hub HK	Bookmap leftover: order-flow visualization, heading still Proposed Partnership with Bookmap

He is not buying evaluations. He is not paying a sponsorship. He is shopping machinery for a competition and a PropTrade announcement he cannot run, plus a tape Bookmap does not even collect.

1a. The email leftover — he did not stack Bookmap with Verodus

Subject: Strategic Partnership Proposal: Expanding Verodus's Global Footprint via World Traders Hub HK. Ask on paper: unpaid official long-term partner of a 2026/2027 global competition with a Hong Kong final. No cash, no SKU, no tracking code, no data license. The body is a Bookmap partnership template:

His words	What that is
Given Bookmap's status as a premier institutional-grade order flow platform	Bookmap is a heatmap / order-flow terminal. Verodus is not.
Proposed Partnership with Bookmap	Section heading never swapped. You are still in the Bookmap slot.
Combining Verodus's advanced order flow visualization and infrastructure	Verodus name pasted onto Bookmap product copy.

If he wanted both vendors he would say Bookmap on the tape, Verodus for Instant / 1-Step / Lite. He assigned Bookmap's product to you. Same class of error as TradeMath's old Linear.app leftovers. He is shopping a platform partner. Last draft that partner was Bookmap. This send, it was supposed to be you.

2. Kim's four lines (21 August 18:03–18:05)

"He wants a percentage of the profits from directing customers to us"

Yes. That is the only cash deal. The email never wrote a rate, SKU, or code. Force the word profits:

If he means	Verodus position
% of net evaluation fees after refunds and chargebacks, on Instant / 1-Step / Lite he actually sent	Take. 15–25%. Unique code. 90 days.
% of trader payouts / "profits" on qualified accounts	Refuse. That taxes the reward pool.
% of company profit	Refuse. Not an equity or P&L partner.

"He has no trading competition. He needs our engine"

Yes. TradeMath championship is a Rolex essay + form plus City & Provincial China language. World Traders Hub HK is email-only — no site, no CR number produced, no OHKF letter. MoniMath PropTrade announced 18 Nov 2025 for January 2026 with no public Instant / 1-Step / KYC / MT5 / TradeHub / payout stack. Verodus has the SKUs, rules, Platform 5, TradeHub, Veriff, fees, resets, Rise/crypto, ~3,000 users. Promote a competition is a landing page. Competition engine is the evaluation CRM. If you agree, the engine stays yours. His brand can sit on the front later. He does not get a fork.

"He wants our data too / we share the data"

He wants it. You do not share it. TAMS is sold as trader behavioral analytics — the LISG/MyAIQuit vocabulary. Labeled tickets, pass/fail, daily-loss, Best Day, payout vs blow-up: Bookmap's FAQ says they do not ingest the user's trading activity. A shop like Verodus is the only place he can get that tape. Live Privacy: trading-behavior data is not commercialized externally; P&L, strategies, and behavior are not shared externally; personal information is not sold. Counsel would have to amend Privacy, put a DPA in place, and you would sell an anonymized license for cash — not throw it in to make a championship look real.

"He wants to promote competition but he doesn't have the engine"

Correct. That is the file in one sentence.

One paragraph for Kim: Joe asked in person for a cut of referred customers and for the stack behind a competition he cannot run. That is real. The email then asked for a free logo and still thinks we are Bookmap. We take the referral if it is a unique code and a share of net challenge fees, rules unchanged. We do not share trading data. We do not give him the engine as his product. If he wants PropTrade, it runs on our rails and we keep most of the GMV after a 90-day checkout floor.

3. Who Joe is

Joe M.Y. Wong. LinkedIn joe-wong-55b3ab262, Hong Kong. Email sign-off: Founder / CTO / TradeMath / MoniMath / World Traders Hub HK. LIS Group About: Founder | Chairman — not CTO. LISG's actual CTO is Jacky Qi Zhang. Not comedian Huang Xi. Not Fed Guy Joseph Wang.

Period	Claim	What is public
1995–2017	Emperor Group / commodities; BRF, JBS, Vitol, Glencore	Unverified. No filing or press tying this Joe Wong to those desks.
2017–2022	COO, Xerbal Group (hemp)	Xerbal exists. Patent US11602701B2 inventor is Peter Matravers, not Joe. LIS/MyAIQuit brands later sit under Xerbal Asia Limited.
MIT Sloan	AI Technology for Business Strategy	Short executive-education certificate (~6 weeks), not an MIT degree.
2022–now	Founder / Chairman, LIS Group (lisg.ai)	Live. MyAIQuit still in beta language in 2026. COO Vincent Cho. CTO Jacky Qi Zhang. CFO Vincent Lai.
2025–2026	TradeMath + MoniMath	WordPress marketing. Thin LinkedIn (MoniMath posts often ~3–5 reactions).
21 Aug 2026	World Traders Hub HK	Named in the Verodus email only. No matching site or OHKF page found.

Pattern: serial partnership operator. Stacks brands, transplants LISG behavioral analytics into TAMS, hunts partners. TradeMath historically carried leftover Linear.app copy. This email carries leftover Bookmap copy. Same operator, not a one-off paste error.

4. Everything he is in right now

Name	What it is	Joe's role	Overlap with Verodus
LIS Group / MyAIQuit	AI smoking cessation; real org chart	Founder / Chairman (site). Not CTO.	None as a product. Character sample only.
TradeMath	Retail education + championships (WordPress). About still claims 35+ years, 50+ networks, 10M+ backtests, 10k asset classes, 10k members, a Jane Street framework — metrics duplicated and mislabeled	Founder in marketing; email says CTO	Possible top-of-funnel. Must not gate Instant.
MoniMath	Institutional/HNWI; TAMS; live H1 still says Bluetooth mode; Type 2 mislabeled as advising (that is Type 4); unnamed SFC partners vs LinkedIn approval 20 Nov 2025 (~3 reactions); PropTrade announced 18 Nov 2025	Co-founder	The overlap. Needs rails Verodus already has.

World Traders Hub HK	2026/27 competition; OHKF / Saudi name-drops	Named on the email only	Logo ask. No public infrastructure.
-----------------------------	--	-------------------------	-------------------------------------

5. Claim table

Claim	Source	Verdict
25% algo / 40% US equities for 6 years on two licensed HK funds	Email	Unverified. No fund names, no audited returns, no SFC CE.
BofA / Crédit Lyonnais / RBC / KPMG executive members	Email	Unnamed. Crédit Lyonnais as a going concern is historical.
10,000+ algo traders	Email / TradeMath	Implausible vs ~3–5 LinkedIn reactions and a WordPress funnel.
1,700-person 2025 event with the Saudi government	Email	No public TradeMath/Joe/WTHHK match. Nearest shape: Algo Challenge Association at Money20/20 Riyadh; they are not on the sponsor list; prizes ~USD 2k.
Our Hong Kong Foundation backing	Email	OHKF is real (Tung Chee-hwa think tank). Link to Joe is not public. Do not sit Verodus next to it without a letter.
SFC Types 1/2/9 partners / MoniMath Capital approval	Site + LinkedIn 20 Nov 2025	Unnamed. Type 2 mislabeled. LinkedIn said approval; site says partners. No CE number.
Canada-listed partner	MoniMath site	Unnamed. Ignore until named.
Joe as CTO of TradeMath / MoniMath / WTHHK	Email sign-off	Contradicts LISG (Chairman) and LISG's actual CTO (Jacky Zhang).
Dissolved similar-name HK company	Generic memo	Could not confirm one tied to Joe. Name collisions exist (PPE World Trading Hub, UAE Traders Hub). Ask for CR number.

6. Bookmap — why the email still says it

Bookmap is a paid order-flow heatmap, not a prop firm. Founder Tsachi Galanos. Bookmap Ltd, Cyprus. Majority-owned by Brazilian fintech Nelogica since 1 November 2024. ~300,000 users claimed at the deal. ~50–60 staff. Software subscription (data extra): free Digital up to ~\$99/mo Global+. Name = order book + heat map. Sits on Rithmic / CQG / dxFeed. Not MT5, not Instant, not a payout firm.

They publish a partner network and a page aimed at prop firms (bulk seats, heatmap inside evaluations, record/replay, retention). That is the genre of Joe's letter. Bookmap writes it to prop firms. Joe sent it as if Verodus were Bookmap. Correct split: Bookmap sells seats; the prop firm sells challenge fees. Joe inverted it.

Bookmap × 10FOUR (11 August 2026)

Ten days before Joe emailed you, Bookmap announced traders can use Bookmap while trading a 10FOUR evaluation or funded account. Roles stay separate. 10FOUR (Ten Four Group, HK CR 79713385, Kwun Tong) is a futures sim-prop: Instant, Origin, Daily; \$25k–\$150k; 90% split; CQG; Riseworks. Same category as Verodus, different stack. Joe is in Hong Kong. No public page ties Bookmap to Joe, TradeMath, MoniMath, or World Traders Hub. He had the language. He did not have the deal. The competent two-vendor letter would have been Bookmap on the tape, Verodus for Instant / 1-Step / Lite. He left Proposed Partnership with Bookmap in a letter to you.

Does Bookmap collect trader data?

Ticks / P&L / strategy: Bookmap's FAQ says no. The app runs on the PC. They say they have no access to personal account information or trading activity. License activation sends OS version and screen resolution. API: orders and live market data do not go through Bookmap servers except Bookmap Data (their own feed). The heatmap is exchange order flow, not a dossier on that user.

Account and website: yes. Privacy Policy (Bookmap Limited, Nicosia): name, email, phone, VAT, profession, country, payment; cookies; unique device ID; Google Analytics; Hotjar session recording; Facebook/Twitter ads; Zoho CRM. A SaaS CRM, not a Verodus-style ticket tape. That is why Joe wants your data, not Bookmap's.

7. The generic "lead-gen + HK credibility" memo

Keep three sentences: Bookmap is a tell; official long-term partner is not a deal; start with a measured pilot. Kill the value thesis. Verodus is already Dubai FZ (Verodus L.L.C.-FZ; payments via Verodus Capital Inc.), ~3,000 users, 175+ countries. Joe cannot add a geography. 10k traders and a 1,700-person Saudi event are marketing, not TAM. OHKF/SFC next to Verodus is the liability. Required education kills Instant. A clarifying call without a Verodus-specific one-pager spends another meeting on a template. Paper first.

8. What Verodus takes (on Verodus terms)

Verodus is a live simulated-evaluation shop: Instant, 1-Step, 2-Step Lite/Pro; Platform 5 (MT5, not for US) + TradeHub; KYC; Rise/crypto. Not a licensed broker. Not live client funds. \$49 in marketing is Instant at 35% off. \$5k-\$200k is 2-Step sizes. \$1M is combined account cap.

Item	Position
Product	Instant, 1-Step, Lite only for the pilot. Not a custom championship account.
Rules	Unchanged. Daily loss, trailing, Best Day, refund policy, KYC stay Verodus's.
Tracking	Unique code / link. No code, no commission.
Economics	15-25% of net evaluation fees after refunds, chargebacks, Instant-fee non-refund.
Prizes	Capped evaluation accounts (e.g. Instant at a defined size). Not live capital. Not uncapped 2-Step Pro.
Term	90 days. Either party walks. No exclusivity.
Brand	Originated by TradeMath / MoniMath. Evaluated by Verodus. No SFC, OHKF, Saudi, or Jane Street in the same sentence as Verodus.
Later	PropTrade white-label on Verodus rails. Verodus keeps ~70-85% of GMV. He does not get raw tickets.
Academy	Optional paid add-on at checkout. Never a gate to Instant.

Kill line (Instant at \$49, 20% of net)

Unique checkouts in 90 days	Gross fees	Verodus keeps (~80%)	His 20%
20	\$980	\$784	\$196
100	\$4,900	\$3,920	\$980
500	\$24,500	\$19,600	\$4,900

Twenty is a meeting that produced a list. Five hundred is a channel. Zero unique codes is a template. Kill at 20 unless mix includes 1-Step / Lite at similar net. Do not model 10,000 algo traders.

9. Refuse

- Unpaid official long-term partner / exclusive logo
- Bookmap / order-flow story assigned to Verodus
- Required TradeMath education
- CRM / tickets / behavioral data (Privacy bans). Free data to train TAMS
- SFC / OHKF / Saudi / two HK funds / Jane Street as co-brand
- Custom championship rules that loosen daily / trail / Best Day
- % of trader payouts or company P&L
- A clarifying call before a Verodus-specific one-pager

10. What to send back

- Correct the product: simulated Instant / 1-Step / Lite; no deposits; no client funds; no brokerage; no order-flow tool. If he wants Bookmap, that is another company.
- Verodus-specific one-pager: named SKU, unique code, 90-day term, 15–25% of net fees. No Bookmap/Linear leftovers.
- Paper on halo if he wants those names in joint copy: SFC CE numbers; OHKF contact; Saudi organizer. Otherwise those names never appear next to Verodus.
- No unpaid exclusivity. No data license. No required education.
- PropTrade is a second document after the pilot clears a checkout floor.

If the next note still cannot name Instant vs 1-Step vs Lite, there is no deal. Do not follow up twice.

11. Reply Alexander can send

Tone: you met him; you are not hostile; you will not sign a blank partnership. Do not attach a term sheet on the first reply. Make him describe Verodus correctly first.

Hi Joe, Good to hear from you after Karma Lounge. Quick clarification so we don't waste a cycle: Verodus is a simulated evaluation firm (Instant and challenge programs, published rules, cash performance rewards). We are not an order-flow visualization platform, and we don't run client brokerage books. If the collaboration you have in mind is challenges / Asia origination / a 2027 competition funnel onto those products, we can talk. If it was scoped for a terminal like Bookmap, that's a different company. For a first discussion I need a short Verodus-specific note covering: (1) which Verodus products you want (Instant, 1-Step, 2-Step Lite/Pro) and whether prize accounts are paid or comped; (2) how you would send buyers (tracked links / codes) — we only share net evaluation fees on tagged checkouts, after refunds and chargebacks, on unchanged public rules; (3) contracting entity, and the SFC CE number for any licensed fund you want associated with this — if there isn't one, we can't be named next to SFC approval; (4) a contact at Our Hong Kong Foundation if you want that name in any joint material, and the same for the Saudi 2025 event (organizer, participant-count source, TradeMath's role). We don't do unpaid exclusive official long-term partner appointments, and we don't license trader data under the current Privacy Policy. Happy to do 30 minutes once that note is in. Alexander

Walk-away

- Free partnership with no unique code and no net-fee share
- Unnamed SFC partner in joint copy

- Exclusivity without a six-figure minimum over a defined term
- Raw tickets, CRM, or behavioral feeds
- Education as a gate to Instant
- Championship rules that loosen daily / trailing / Best Day
- Repeat of Bookmap / Saudi / OHKF language after you asked for paper

Bottom line

Joe chairs a real smoking-cessation company, markets TradeMath and MoniMath, and named World Traders Hub HK on a Bookmap template. In the room he asked for a referral cut, your engine, and your data. On paper he asked for a free logo. Verodus's benefit is tagged Instant / 1-Step / Lite fees on unchanged rules, then maybe PropTrade on Verodus rails. Everything else is either unverified or actively harmful to repeat. Three asks, not one yes.
