

# Reprice: more leftover, still under the named peer

News is included on every phase and funded account — not an add-on. Book leftover after opex + 20% ads \$5,850/mo → \$8,296/mo (+\$2,446). Sale \$48,809 → \$51,866. Leftover / sale 12.0% → 16.0%. Instant barely moves: \$5k–\$10k / \$50k–\$100k are already \$1–\$5 under FundingPips or Blue Guardian.

## 1. Rule

Use the news-on BE. Keep leftover ≥ ~\$7 on small SKUs. Do not match a peer that fails the opex stack (Maven \$5k–\$25k, Alpha Instant, BrightFunded \$200k). Instant stays under Blue Guardian and FundingPips Zero. 1-Step sits under the Alpha / Fintokei / BG \$398–399 cluster and under Hola at \$25k. Lite stays \$2–\$4 under Maven where Maven covers (\$50k / \$100k). Pro stays a step above Lite and under Alpha Pro 6% from \$50k. List = round(sale / 0.65). VERO35 still 35% off list.

Yellow = sale moved. Green = Instant pinned to the street ceiling. 1-Step \$5k \$45 is \$5 over Alpha One \$40 and \$2 under Hola/BG \$47 — Alpha is the closest peer; take the leftover rather than sit at \$1 after news-on BE.

4. Add-on rec — news dropped, percents into the street band

News is included, so the 12% News SKU and the 20% Swing bundle are gone. Weekend 12→15% (live was 18%). Weekly 8→10% (BG 7-day is 15% on evals). On Demand 80% 12/15→15/18 Instant. 90% 12/15→15/18 Instant (BG Instant 90% is 15%; evals match BG 15%). 90% On Demand 20/32→25/35 Instant. Evals 25% matches BG’s 90%+7-day both-25%. Instant 35% is the year-1 floor with a ~\$11 cushion; do not copy BG Instant 15%.

7. What not to do

Do not raise Instant \$5k / \$10k / \$50k / \$100k — each is already \$1–\$5 under FundingPips or Blue Guardian. Do not copy Maven \$18 / \$35 / \$79 (opex hole). Do not copy Alpha Instant \$274 at \$100k. Do not put News back on checkout. Do not sell Swing at 20%. Door headline stays Instant from \$49; 1-Step from \$45; Lite from \$49; Pro from \$55.
