

Break-even by account and recommended sale

Every Verodus size has a stated BE. Instant uses year-1 cost. 1-Step / Lite / Pro use first-payout + fee refund. Recommended sale is multi-factor — not the family median. 16 August 2026.

Instant BE = $E[X]_{\text{first}} \times (P_{\text{yr1}} / P_{\text{pay}})$ = \$875.25 × (7.161% / 22.07%) = **\$284 at \$100k**, then × size/100k. No refund. **Eval BE** = $E[X] / (1 - P(\text{pay}))$: 1-Step \$108.10 / 0.91192 = **\$119**; Lite \$136.01 / 0.89384 = **\$152**; Pro \$132.54 / 0.88002 = **\$151** at \$100k, then × size/100k. $F_m = BE / (1 - m)$. List = sale ÷ 0.65. Instant \$200k pulled.

Rec factors: (1) stay above BE and, on Instant, at or above the 40% column when that is still cheaper than Goat / Instant Funding; (2) sit on the closest twin shoppers click (Goat 3/6 Instant, Hola 1-Step, Ment/FN Lite, Goat/Maven 2-step) — not the family median dragged by Alpha / FXIFY Lite; (3) never raise a live eval that is already the cheapest name and fat; (4) do not match Instant \$100k holes (Alpha \$274, BG \$467) as a target; (5) shop-round fees.

1. Recommended Verodus sale (VERO35)

Green = recommended sale. Instant is a cut vs live toward Goat / the 40% column. Evals are unchanged. Instant \$100k rec \$529 is +46% on year-1 BE \$284 (20% = \$355, 40% = \$473, 60% = \$710).

2. Break-even for every Verodus account

This is the number the rest of the card is built on. Instant also shows first-payout $E[X]$ so the old \$875 / \$1,094 path is visible and not used.

Green = Instant (year-1 BE). Blue = evals (first-payout BE). 1-Step \$5k BE is \$6; sale \$36 is +76%. Instant \$100k BE is \$284, not \$875.

3. Why Instant first-payout margins were wrong

Same-difficulty Instant (D 84–94): Blue Guardian, Instant Funding, Goat, Hola, FP Zero, FXIFY Lite, Alpha. They charge **\$274–\$839** at \$100k. Our first-payout book put Verodus Instant E[X] at **\$875** and the 20% fee at **\$1,094** — above every peer — and painted those peers at –30% to –95%. A market that keeps selling Instant at Goat / BG / IF prices is not all insolvent. The industry report already said **year-1 (7.2% of buyers) prices Instant**, not first-payout eligibility (22%). First-payout 22% is “hit 5 valid days”; most of those accounts die in month 1 (PropScorer 41% of funded). Sustained Instant is 4–6% (Track360) — this book’s year-1 is 7.2%. **Instant E[cost] = $E[X]_{\text{first}} \times (P_{\text{yr1}} / P_{\text{pay}})$** . Evals stay on first-payout + refund (those margins already matched the shelf).

4. Rec vs BE / 20% / 40% / 60% (Instant = year-1)

Instant: **BE = $E[X]_{\text{first}} \times (P_{\text{yr1}} / P_{\text{pay}})$** , no refund. Evals: first-payout E[X] and refund $\Rightarrow$ **BE = $E[X] / (1 - P(\text{pay}))$** . $F_m = BE / (1 - m)$. Rec is the shopper price.

Green = rec is below BE (a hole). Blue = rec equals live and is above BE. 1-Step / Lite / Pro rec sits between the 40% and 60% columns — attractive and still fat. Instant rec is now above year-1 BE at every size (near the 40% column at \$100k). Green would mean below BE — Instant should not be green on this basis.

5. Instant — every instant street fee

Factors, not the median: (1) year-1 BE so the size prints, (2) ≥ 40% column when that still sits under Goat / Instant Funding, (3) Goat 3/6 as the twin shoppers click, (4) under Instant Funding and Hola, (5) do not match Alpha \$274 or BG \$467 at \$100k as a target — those are the cheap holes. Rec \$63 / \$99 / \$199 / \$319 / \$529. \$25k+ is Goat, not the median pulled down by Alpha / FXIFY Lite / FP. \$100k \$529 is the 40% column (\$473) plus a CPA buffer, still under Goat \$559 and IF \$639. No \$200k Instant.

10. Rec vs family low / median / average / high (context only)

% is (rec – stat) / stat. Negative = cheaper than that mark. Family = every Instant, every 1-step, or every 2-step — the page a customer opens. 5ers Hyper Growth (\$260 / \$450) pulls 1-step \$5k / \$10k average up; ignore it.

Median is context only — rec is not set to it. Instant \$25k+ sits on Goat, not on the median pulled down by Alpha / FXIFY Lite. Same book 7/22/26/28/17.
