

Difficulty score and 40% / 60% rank

Every plan gets a difficulty D (0–100). We only rank a peer if it is the same family, the same size, and $|D - D_{\text{Verodus}}| \leq 6$. 16 August 2026.

$D = 0.55 \times \text{rules} + 0.45 \times \text{book}$. Rules use the catalog card: daily DD (none / 5% / 4% / 3% / 2%), day’s-high vs SOD, max DD, static vs hybrid vs trail, trail lock (–4), consistency, target ÷ max DD, min days, 2% risk caps, extra eval phases. Book is $100 \times (1 - P(\text{pay}))$ on this Monte Carlo. Higher D = harder to get paid. **Band ±6** is about one daily-DD step after the 0.55 rule weight — tight enough that no-daily Instant cannot sit next to Verodus Instant (D 89.2), and Lite (D 77.7) cannot sit next to Pro (D 64.0).

1. Difficulty score — every plan

One row per product (D does not change with account size). Verodus rows highlighted. Sorted easiest → hardest.

7. What the band does

FundedNext Instant (D 46.9) and FXIFY Standard (D 39.3) are 40+ points below Verodus Instant (D 89.2) — no daily, P(pay) ~53%. They never enter the Instant rank. Blue Guardian Instant is D 84.2 (SOD daily + trail lock), ΔD 5.0 vs us — inside the ±6 band, the closest Instant twin. Instant Funding, Hola Direct, Goat, FP Zero, FXIFY Lite and Alpha Instant are also in-band. Lite (D 77.7) ranks against FN Lite (D 77.1) / For Traders / Ment, not against FTMO 2-Step (D 63.2). Pro (D 64.0) ranks against the FTMO-class 10%/5% set. Same book: 7/22/26/28/17. Instant \$200k removed.

D formula: sim/difficulty.py · band ±6 · SKUs: results/industry_skus.csv · scores: results/difficulty_scores.csv.
