

Attractive Verodus sale card vs competitor street

Priced for the shopper, not for difficulty. Rec is at or under the same-family median (what customers see on Instant / 1-step / 2-step pages). 16 August 2026.

Rule: never recommend a fee above the family median, and never raise a live fee that is already under that median. 1-Step / Lite / Pro stay at today’s VERO35 — they are already the cheap names on those shelves. Instant is cut to the Instant median so we sit with Goat, not above Instant Funding / Hola. List = sale ÷ 0.65. Instant \$200k pulled.

1. Recommended Verodus sale (VERO35)

Plan	\$5k	\$10k	\$25k	\$50k	\$100k	\$200k	Live \$100k	Rec m \$100k	Why this number
Instant	\$63	\$99	\$175	\$279	\$499	—	\$676	-75%	Family median (Goat-class). Under IF / Hola.

2-Step Pro	\$20	\$36	\$85	\$163	\$296	\$577	\$296	+43%	Keep live — #2 after Maven, under Goat / FTMO.

Green = recommended sale. Instant is a cut vs live. Evals are unchanged. Instant \$100k rec \$499 is –26% vs live \$676 and –6% vs Instant Funding \$639. Margin at that size is negative — attractive Instant \$25k+ does not print.

2. Rec vs BE / 20% / 40% / 60%

Same book as the industry report. Instant has no refund ⇒ **BE = E[X]**. Evals refund on first payout ⇒ **BE = E[X] / (1 – P(pay))**. Fee at margin m: **F_m = BE / (1 – m)**. 20% / 40% / 60% are the print / target / fat fees. Rec is the shopper price; it is not forced up to those columns.

Green = rec is below BE (a hole). Blue = rec equals live and is above BE. 1-Step / Lite / Pro rec sits between the 40% and 60% columns — attractive and still fat. Instant \$5k / \$10k sit near 20–40%. Instant \$25k+ is under BE.

3. Instant — every instant street fee

Shoppers compare every Instant on the page — Alpha \$40, BG \$54, Goat \$63, Hola \$79 at \$5k; Alpha \$274, BG \$467, Goat \$559, Instant Funding \$639, Hola \$839 at \$100k. Live VERO35 sits above the family median at every size. Rec cuts to that median (Goat-class, shop-round): \$63 / \$99 / \$175 / \$279 / \$499. Under Goat and Instant Funding; above only the loss-leader Alpha / FXIFY Lite holes. \$5k / \$10k still print. \$25k+ does not — that is the cost of being cheap enough to click. No \$200k Instant.

4. 1-Step — every 1-step street fee

Live is already the cheapest 1-step on the shelf at every size except \$5k (Fintokei \$35). \$335 vs FTMO \$579 / FN \$570 / Hola \$463 at \$100k. Keep live. Raising toward Hola would make the card less attractive, not more.

8. Rec vs family low / median / average / high

% is (rec – stat) / stat. Negative = cheaper than that mark. Family = every Instant, every 1-step, or every 2-step — the page a customer opens. 5ers Hyper Growth (\$260 / \$450) pulls 1-step \$5k / \$10k average up; ignore it.
