

Like-for-like break-even rank at 40% / 60%

Family name is not enough. Ranks below are only against plans with comparable rules, then street is scaled by break-even so an easier plan does not look cheap. 16 August 2026.

They were not all comparable. The first rank report put every Instant in one pool — including FundedNext / FXIFY Standard, which have **no daily** and P(payment) ~53% versus Verodus Instant 22%. It also mixed Verodus Lite (8% static) with FTMO / FP Pro (10% or 6/6). Those are different products. This revision groups by the binding rules, then difficulty-adjusts.

Difficulty adjustment. Adj street = peer sale × (Verodus BE / peer BE) at the same size. A peer with a higher BE (easier / richer payouts / refund) has its sticker scaled down — they are cheaper than they look for the risk they take. A harder peer (lower BE) has its sticker scaled up. Easier / Similar / Harder is peer BE vs Verodus BE: >1.15× easier, <0.85× harder. Verodus @40% and @60% ranks are against those **adjusted** like-for-like street prices. Rank 1 = cheapest. Instant \$200k is not offered.

1. Verodus — 40% / 60% rank vs like-for-like only

Parentheses are the difficulty-adjusted rank inside the rule cohort. Street (rk) is raw rank among those same like plans (no adjustment).

Plan	Like cohort	Size	BE	Street (raw rk)	@40% vs like (rk)	@60% vs like (rk)	Like n	Like cheapest adj	Like dearest adj

14. How to read difficulty

Blue Guardian Instant is the only Instant that is both the same card (3% / 6% / 20%) and Similar on BE (\$911 vs our \$875 at \$100k). Their trail locks and daily is SOD, so they are a touch easier — Adj \$ at \$100k is \$448 versus street \$467. Ranking us against them is fair. FundingPips Zero and Alpha Instant are the same 3%-daily class but slightly harder on this book (lower P(pay)); Adj \$ rises versus raw street, and they are still a hole. FundedNext Instant and FXIFY Standard stay in their own table: no daily is not our Instant. 1-Step: rank against the 6% max-DD set (Hola, Alpha One, E8, FN, Fintokei, TFT), not against FTMO’s 10% trail or FP Flex 12%. Lite: only the 8% static 2-steps. Pro: the 10%/5% FTMO-class set, not FP Pro 6/6.

Book: results/industry_skus.csv · Cohorts: sim/write_rank_report.py · Adj \$ = street × (Verodus BE / peer BE) · Instant \$200k removed · Lite funded 8% · BG Instant = live BG25.
