

310-account book — leftover after opex

Instant 98 · 1-Step 67 · Lite 82 · Pro 63 · 310 accounts. CAD 10,000 wages (~\$7,200) are fixed. Challenge leftover \$10,219/mo (18.8% of \$54,270 sale revenue).

1. Monthly P&L; at 310

Leftover = sale × 0.80 – (BE × 1.10 + \$1 + wage). Instant BE is year-1 E[X]. Eval BE is first-payout E[X] / (1 – P(payment)), so the fee refund sits in BE. Sale m in the SKU table ignores ads, wages, \$1, and the 10% error — do not run on it.

Line	\$ / month
Challenge revenue (VERO35 sale)	\$54,270
Ads 20%	–\$10,854
Payout BE	–\$23,352
10% error on BE	–\$2,335
\$1 per account	–\$310
Wages CAD 10,000 × 0.72	–\$7,200
Leftover after opex	\$10,219

1-Step carries most leftover because P(payment) is 9.4% and the \$25k–\$100k doors sit well above the opex floor. Instant leftover is thinner: year-1 BE is the whole fee job. Lite \$5k is about \$0 after allocated wages — keep the Hola/TFT street door.

2. Volume — wages do not scale

Same mix. Wages stay \$7,200. At 150 accounts leftover compresses; at 600 it fattens. Do not price as if 310 is a forecast — it is the wage-allocation book.

Accounts / mo	Revenue	Wages	Leftover	of revenue
150	\$26,260	\$7,200	\$1,229	4.7%
310	\$54,270	\$7,200	\$10,219	18.8%

Green = Instant. Blue = evals. No row is more than \$1 under the floor. Lite \$5k leftover is about \$0; Pro \$5k/\$10k and Instant \$5k/\$10k are the next thinnest.

4. Add-ons, attach-weighted

News attach = 0. Weekend / Weekly / On Demand attach is the early-book mix (not 100% of N). Rec card is Weekend 12%, Weekly 70% 8%, On Demand 90% 15% evals / 32% Instant. Checkout still bills 15% / 6% / 20%.

Card	Weekend	Weekly 70%	On Demand 90%	Extra leftover
Rec 12% / 8% / 15–32%	\$576	\$191	\$447	\$1,214
Checkout 15% / 6% / 20%	\$764	\$114	\$348	\$1,225

Blended leftover at rec add-on %: \$11,433/mo. At checkout 15/6/20: \$11,444/mo. Instant \$100k On Demand at 20% still does not print as a unit; the mix can.
