

Where these wording changes put Verodus

Clean review of the remaining copy brief · 21 August 2026

Label after this pass: an unproven Instant/challenge simulated-evaluation firm with careful FAQ and Terms, one UAE FZ name, Instant-search marketing, and simulated accounts stated on the same screen as Funding Traders Worldwide. Not a scam site. Not a licensed broker. Not live capital. Not a known payer. Hero and meta still sell Funded on day one from \$49.

The remaining pass (only this)

Light phrase swaps. No hero rewrite, no meta rewrite, no Instant pricing rewrite, no Trustpilot rewrite, no Why Verodus rewrite, no How it works rewrite, no FAQ rewrite except two phrases. Bios stay in Read Bio modals (fill them; do not move them onto the page). One new line under the hero CTAs: Simulated accounts. Cash rewards when you qualify. No deposit of trading capital.

In	Out
One line under hero CTAs: Simulated accounts. Cash rewards when you qualify. No deposit of trading capital.	Hero H1, subhead, CTAs. Title Instant from \$49. Funded on Day One.
FAQ: drop discretionary. Terms: pay if rules + KYC; withhold for breaches.	Meta: Funded on day one from \$49. 1-Step from \$45. Lite from \$39. \$5k-\$200k. Keep 80%. No deposit.
One legal name: Verodus L.L.C.-FZ. Payments: Capital Inc. affiliate.	Instant table \$200k row, leftover \$296 / -35% line, refund sentence.
Instant label, FAQ Instant line, dashboard, Privacy: Instant / Qualified Performance, not Funded.	Trustpilot 4.5/5. Quotes. Platform 5 on Why Verodus. Trading is simulated on No Personal Capital.
Stat strip: 3,000+ traders; 90% reward split. Keep \$1M and <24h as-is.	How it works, calculator, bottom CTA.
About: Leadership heading. Behavioral analysis -> risk control. Fill Read Bio modals (founder proof). Do not paste bios on the page.	About opening / mission copy. Moving bios out of modals.
Certificates: unique IDs or hide duplicates. Copy stays Real traders. Real certificates.	Any other section rewrite.
Blog body numbers to live rules, or unpublish. Meta of that page stays.	We sell trading data on marketing pages.
Privacy (counsel-gated): anonymized/aggregated data license clauses. Not on homepage.	Hero H1, subhead, CTAs unchanged. Meta unchanged.

Where it puts Verodus

Audience	Before this pass	After this pass
Google / Instant buyer	Funded on day one from \$49. Keep 80%. \$5k-\$200k.	Same search snippet. First screen now also says simulated accounts, cash rewards, no deposit.
Trader who reads FAQ / Terms	Rewards are discretionary. Two legal names. Instant labeled Funded.	Pays if you meet the rules and KYC. One company. Instant labeled Instant.
Experienced prop trader	Unproven Instant shop with sloppy contradictions.	Unproven Instant shop with fewer self-inflicted leaks. Still waits on payout proof.
Partner / bank / counsel	Simulated service; entity fog; discretionary bonuses.	Simulated service; one FZ entity + payment affiliate; rules-based bonuses.
Data buyer (if Privacy ships)	Public Privacy forbids external commercialization of trading behavior.	Still no PII sale. Counsel-gated anonymized feature tables only. Invisible on the homepage.

Sector ladder: 1 clone scam 2 unproven Instant shop with sloppy copy 3 unproven Instant shop with careful copy 4 known payer with a public track record 5 licensed or live-capital firm. This pass moves Verodus from 2 toward 3. It does not reach 4. Copy cannot buy 4. Verifiable payouts and independent talk can. It never reaches 5 unless the product itself changes.

Scorecard

Dimension	Before	After
Search / Instant pitch	Funded on day one from \$49	Unchanged
Payout promise	Discretionary	Rules + KYC; clawback for breaches
Legal identity	LLC vs L.L.C.-FZ	One FZ name + Capital Inc. affiliate
Funded vs simulation	Funded on Instant cards next to simulated capital	Hero/meta keep Funded; one line under CTAs says simulated; cards say Instant
Stat strip honesty	Profit split + \$1M max capital	Reward split; \$1M stays
Social proof	4.5 Trustpilot, first-name quotes, duplicate certificates	Trustpilot and quotes stay; duplicates should go
About polish	Smashed heading; behavioral analysis; empty-feeling leadership	Leadership; risk control; founder proof inside modals
Price / SKU match	\$49 meta vs \$72 Instant; \$200k Instant in table	Unchanged (pricing skipped)
Public payout proof	None independent	Unchanged

What gets better

- Discretionary was the worst leak. Is Verodus legitimate? currently tells a careful reader you might not pay even if they followed the rules. After the swap, the same answer says you pay when rules and identity checks are met. That is the one line that changes how a serious trader buckets the firm.

- One legal name kills the two-company / shell-stack read. Privacy LLC and Terms L.L.C.-FZ were the same firm presented as two. A real FZ operator shows one name.
- Instant as the phase label, Simulated Instant account in FAQ, and Qualified Performance on the dashboard let the hero keep search language without repeating Funded next to simulated on every card.
- Reward split on the first strip matches Global reach. Profit split implied live P&L.
- If duplicate certificate amounts go, the payout strip stops looking generated. If they stay, that block still costs more trust than it buys.
- One line under the hero CTAs puts simulation on the same screen as Funding Traders Worldwide: Simulated accounts. Cash rewards when you qualify. No deposit of trading capital. H1, subhead, CTAs, and meta stay locked. Search still says Funded on day one from \$49. The page no longer hides simulated until FAQ.
- Leadership and risk control remove two amateur tells. Founder proof is filling the Read Bio modals with photos, LinkedIn, and checkable work history, plus registry and one filmed AMA. That is off-copy work, not a heading change.

What still hurts

- \$49 in hero and meta versus Instant table from \$72. Screenshotters will still post the gap. This pass leaves it.
- Meta says \$5k-\$200k and Keep 80%. Instant FAQ still says no \$200k Instant and default 80% / 90% with On-Demand. Homepage Instant can still show \$200k. Pricing module was skipped.
- \$1M Max Capital stays while live SKUs top out at \$100k Instant / \$200k evaluation. That number still looks invented.
- Rated 4.5 / 5 on Trustpilot stays without a confirmed clickable profile. First-name testimonials stay. Social proof is still self-issued.
- No Reddit, PropFirmMatch, or independent payout corpus. Wording does not create that. Until it exists the honest public label is unproven, not scam, not FTMO-grade.

How to create founder proof

A stranger must be able to confirm two named people run Verodus. Keep bios in the existing Read Bio modals. Do not paste them onto the About page.

- Each modal: real photo (same as LinkedIn), name as on the Dubai FZ record, CEO/COO title, two to four checkable sentences of prior work plus what they run at Verodus, and a LinkedIn URL that opens. No invented banks or degrees.
- Registry: Verodus L.L.C.-FZ public search with the same two names. Only publish a license number if it matches.
- LinkedIn company page lists both as founders. Personal profiles name Verodus and are not empty.
- One filmed appearance (Discord AMA or short video) with the same faces. Leave it up.
- Same names on the trader agreement and any PropFirmMatch or press listing. Do not buy interviews or use stock photos. Founder proof answers are these people real. It does not answer do they pay.

Privacy amendment (counsel-gated, not marketing)

If counsel does not sign, skip the data-sale clauses. Current Privacy still bans external commercialization of trading behavior. Shipping a MoniMath license against that text is a policy breach.

If counsel signs and the extract is aggregated or irreversibly anonymized, Verodus can license feature tables and research labels. That does not change the homepage. Retail still sees Instant funding. A partner who reads Privacy sees a simulated-evaluation firm that may license anonymized telemetry. Still never: PII, KYC, wallets, IPs, raw tickets that reconstruct a named trader's edge.

Clean verdict

Do the edits. They close the worst self-inflicted leaks: discretionary, two names, Funded as a phase label, smashed About heading, and simulation buried in FAQ. After they ship, Verodus is a careful Instant shop, not a new kind of firm. Attractive to Instant buyers on Google. Less alarming to traders who read the first screen, FAQ, and Terms. Unchanged for anyone waiting on third-party payout proof. Reputation in this category is paid for with verifiable payouts, a Trustpilot people can open, numbers that match checkout, and founder proof (registry + LinkedIn + one filmed AMA). Those last items remain mostly outside copy.

Scope: remaining items in docs/verodus-website-wording-changes.md as of 21 August 2026 only. Compared with live verodus.com. Not an audit and not legal advice. Privacy data-license text is not public until counsel signs.
