

Verodus analysis

Internal briefing · 20 August 2026

Verodus is a real, small simulated-evaluation shop whose P&L is evaluation fees plus tightly gated discretionary payouts. It is not a broker and not live capital. Scale (about 3,000 users) is the constraint; labeled trader-behavior data is the scarce asset.

What it is

Dual stack (Platform 5 / MT5 + TradeHub), Instant / 1-Step / 2-Step Lite / Pro, KYC, Rise/crypto payouts. Public legal names do not match:

- Verodus L.L.C.-FZ — Terms of Service; Dubai / UAE governing law.
- Verodus LLC — Privacy Policy data controller and Risk Disclosure.
- Verodus Capital Inc. — all fees and performance rewards.

Kim Chen is CEO; Alexander Vladimirovich is COO. No free-zone, license number, or registered address is published on the pages reviewed.

How money works

Instant is the high-margin door: no fee refund, 3% daily / 6% trailing max that never locks, Best Day $\leq 20\%$. 1-Step and 2-Step refund the fee on first payout, so they only work if most buyers never get there. "Make traders better" without more volume or a new cash line (data, add-ons, white-label) is a cost.

What is strong

- Live product and published rule pages (Instant, 1-Step, 2-Step Lite/Pro).
- Unusually honest simulation and discretionary-reward legal language.
- A coherent fail-heavy Instant design, not an accident.
- CRM data that most "AI trading" firms cannot buy: labeled pass/fail paths.

What to fix before selling data or buying exposure

- Align the three legal names and publish a free-zone / service address.
- Either put a live Trustpilot URL behind the 4.5 claim or drop the number.
- Stop copy drift: blog still cites 10%/5% targets; hero "from \$49" vs Instant table; homepage payout carousel repeats \$9,401.23 for both Jose and Joe.
- Do not license behavioral data until the 21 February 2026 privacy policy is amended. It currently forbids external commercialization of trading-behavior data.

Recommendation

Grow units at current rules (affiliates / paid white-label). Keep Instant tight. Productize anonymized data only after counsel updates privacy. Make payouts verifiable. Loosening rules for "exposure" is the wrong trade.
